

Bucket Forks

ALL-PRO Forks offer the best Bucket Fork Kit in the industry! Here's why:

- Our kit's design, distributes the weight evenly across the bucket protecting your equipment.
- Can hook & unhook the forks without leaving the seat of your machine.
- Easily adjust the spacing of your forks for wide or abnormal loads.
- Solid steel - forks, hooks & shaft give you durability & dependability.

We stock 5 kit sizes:

2,500 pound kit with 42" forks fits buckets up to 32"

4,500 pound kit with 48" forks fits buckets up to 38"

6,000 pound kit with 48" forks fits buckets up to 38"

8,000 pound kit with 48" or 60" forks fits buckets up to 43"

We offer custom sizes up to 20,000 lbs

Why All-Pro Forks?

Quality:

With over 15 years of experience, **ALL-PRO FORKS** is a leading supplier of quality forks in the market today. We make our frames and attachments in-house, giving us the ability to inspect every part from start to finish. This ensures every frame is made to our standard of quality, and ready to work.

Versatility:

Different jobs require different forks or attachments. Here at ALL-PRO FORKS, we stock a wide selection of ITA Class I, II, III, & IV forks. We also carry many sizes of blank, shaft mount, block, fully tapered polished forks and extensions.

Value:

We provide great value to our dealer network, high quality, and a convenient ordering process. We take into consideration every customer's needs and budget are different. We also take special requests for stocking specialty items to keep your supply line consistent and dependable.

SUPPLY CHAIN:

If you're an OEM, rental company, construction company, etc. We can set up a logistical schedule for your company, that can save you money and time.

Shaft Mount Forks

Shaft mounted or pin-type forks, are commonly used on telehandlers, wheel loaders, and forklifts over 15,000 pounds capacity. Instead of mounting on flat, notched steel, shaft-mounted forks ride on a round bar.
